

## CASE STUDY

# Secure plumbing solution for Grade I historical home

## Project at a glance

- Grade I listed home renovation
- 1250 sqm
- Domestic hot & cold water
- Pre-Insulated pipe & MLCP, MLCP with insulation and metal press fittings

"Working on listed buildings requires the highest quality materials to ensure a fault free future. I trust Multipipe's products with my reputation and know there won't be any issues for years to come".

**Chris**  
C.R.H. Plumbing & Heating

## OBJECTIVE

When the new owners of a 13th century, Grade 1 listed building on the Worcestershire border wanted to renovate C.R.H. Plumbing & Heating Ltd was the obvious choice. As well as being local, C.R.H specialises in the careful work required with period properties.

With around 95% of the property needing to be re-piped Chris wanted a solution that was secure, reliable and would retain heat to offer maximum fuel economy.

## SOLUTION

Multipipe's MLCP & pre-insulated MLCP was chosen for heating, cold water, hot water and specifically the hot water returns. Our pre-insulated MLCP is colour coded for easy identification and Chris deems our fittings to be small and neat with a degree of flex even once pressed.

C.R.H. needed to run water from the external plant room to the internal plant room and so used 100m of Multipipe's 75mm single heating pre-insulated underground pipe to ensure a long term, secure solution.

Whilst Multipipe products may not be as cheap or as quick to fit as plastic push fit alternatives, Chris from C.R.H believes they are worth the investment as the quality is far superior. When working on listed or luxury properties Chris was not prepared to compromise on quality which is why he is much sought after in the Worcestershire area.

The project turned out to be far bigger than initially expected, and whilst Phase 1 is progressing well, there are two further phases planned which may keep Chris on site for another two years. We look forward to supporting Chris through the completion of this job.

Jackie Young, Sales Director at Multipipe, said: "Whether you buy our products direct from us, or via your local merchant, you can rest assured we're here to support your project at every stage".
